Lot 6. Rolex — Submariner s.c. “Sultan Dial”

Welcome to Important Watches — this spring’s highlight for all watch enthusiasts

Kaplans watch department are always proud to present the final catalogue for the Important Watches auction.

This year we all had a harder time than ever to pick our favourite lots – there is just too many good ones. Not surprising since there are as many as 131 carefully curated pieces to choose from. From a wide range of vintage pieces to sought after modern classics, we believe there is something for everyone.

Few things get us as excited as watches with interesting provenance. At this auction, we can present two pieces that comes with fascinating history from the world of aviation. Lot 29 is a Universal Polarouter with a “SAS-dial”. The watch was owned by Captain Lennart Sjöberg who has an interesting background in both the Swedish Airforce and commercial flights. Make sure to read the provenance letter provided by his son Jan.

The other watch is Lot 90, a Lemania “Viggen”, from the first batch of Lemania watches assigned to Viggen pilots. This chronograph has accompanied its previous owner in flying all versions of the Viggen aircraft. Due to personal reasons, the seller has chosen to be anonymous, but the final buyer will be presented with more information after the sale.

We are delighted to present a great variety of vintage watches from Vacheron & Constantin. Two highlights are the triple calendars with reference 4240, Lot 77 and 120, from the 1940s.

Lot 120 is made in 18K gold and comes with an Extract from the Archives, Lot 77 is made in steel and it’s believed that it has only been made about 50 pieces in this execution.

A watch that took us all by storm is Lot 85, an Omega Constellation from the 1980s in 18K gold and with the most beautiful Lapis Lazuli dial. A real showstopper that cannot be missed.

And as always, there is a varied selection of Rolex watches to choose from. From vintage sports watches like the “Double Red” Sea-Dweller with Lot 53 or Lot 126, the GMT-Master Ref. 16750 with box and certificate from 1981 to modern gold Daytonas (Lots 35, 68 and 111). Others that will make you stand out in a crowd are Lot 6, a full gold Submariner with a so-called “Sultan Dial” or the two rare King Midas (Lots 39 and 40).

We hope you will all find this catalogue as varied and interesting as we do and would like to wish both sellers and buyers an exciting Saturday!

Kaplans through,

Georgios Batselas

Christian Blomberg

Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 11.70 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20%, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

Example

You make the winning bid for an item at SEK 10 000. The amount you pay is calculated in the following way:
 SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:
 Sales price up to SEK 200 000: 20%
 Sales price between SEK 200 000 – 500 000: 10% on the excess
 Sales price above SEK 500 000: 5% on the excess

Premium example:

You have won an item for SEK 750 000
 200 000 x 20% = SEK 40 000
 300 000 x 10% = SEK 30 000
 250 000 x 5% = SEK 12 500
 Total buyer's premium = SEK 82 500
 The hammer fee is SEK 50
 Total amount: SEK 832 550

Important Watches – at Kaplans Auktioner

Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktioner's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktioner's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

Lot 11. Audemars Piguet — Royal Oak

The Royal Oak's status as an iconic design in the world of watches is indisputable.

Launched in 1972, the Royal Oak over the years evolved into a broad family of models with variations in size, case, and bracelet materials as well as the addition of various complications.

Lot 11, the Ref. 15202OR, "Jumbo – Extra Thin", is closely tied to the original 1972 model in form but executed in 18K pink gold. Through the exhibition case back the calibre 2121 can be viewed in full glory and the dark blue dial with the distinct "Petite Tapisserie" pattern contrasts beautifully with the pink gold. The low profile of the watch (only 8,1 mm) in combination with the exquisitely constructed bracelet makes for a very comfortably wearing watch.

Important Watches Spring 2024 also feature Lot 9, a ladies' Royal Oak in tantalum and pink gold and Lot 43, a Ref. 15202ST, "Jumbo – Extra Thin", in stainless steel.

Lot 29. Universal Geneve — Polarouter

It was in the beginning of the 1950s that commercial flights became more common, and the Scandinavian airline SAS (Scandinavian Airlines System) wasn't late to follow the trend with longer flights. Their new route went from Copenhagen, over the North Pole, to Los Angeles. This was in 1954 and Universal Genève provided the pilots and flight crew with their new watch "Polarouter". The name was a mixture of the words "Polar" and "Route" but was renamed to "Polarouter" the year after.

Lot 29 was owned by Captain Lennart Sjöberg, a pilot that started his career in the Swedish Air Force and later became one of the first SAS pilots to fly the new route in 1954. Make sure to read his full story in the provenance letter online, provided by his son Jan.

Lot 32. Jaeger-Le Coultre — Master Perpetual

The Jaeger-Le Coultre Master Perpetual, reference 140.204.802B, with the distinguished calibre 889/440/2 is a true beauty. This watch not only tells time, but also boasts a calendar complication revealing the day, date, month, and year until year 2100. Also adding to both looks and function does the spectacular moon phase indicator. This watch truly combines meticulously crafted design with functionality and timeless elegance.

Lot 39. Rolex — Cellini King Midas

Rolex introduced their new model King Midas in the early 1960s. It is said to be designed by legendary watch designer Gérald Genta, but Rolex has never confirmed it. The name King Midas comes from Greek mythology where it was said that all that King Midas touched, turned into gold. When launched, the version with a gold bracelet was the heaviest wristwatch of its time, weighing somewhere between 150-200 grams.

The King Midas has been seen on several celebrities through the years, and none the less by “The King of Rock” himself Elvis Presley who received one as a gift in 1970.

At this auction we can present two King Midas Ref. 4017, Lot 39 in white gold and Lot 40 in yellow gold.

Lot 85. Omega — Constellation “Lapis Lazuli”

The Omega Constellation series was first released in 1952 as the finest of the Omega collections. The model would become a symbol for luxury and prestige and is still in production today – even though it has changed considerably through the years.

Lot 85 is made of 18K solid gold, inside you find a Calibre 1445 quartz movement and last but not least, it has a stunning Lapis Lazuli dial. Lapis Lazuli is a semi-precious stone known for its deep blue color. It has been used for thousands of years in jewelry, decorative objects, and as pigments for paintings.

Lot 90. Lemania — “Viggen”

Watches, aircraft and militaria has always been fascinating to watch enthusiasts, and the combination has often made objects into collectibles. One of the Swedish Air Force’s contributions is Lemania “Viggen”.

Saab 37 Viggen was a fighter jet delivered to the Swedish Air Force in 1971, and in production until 1990. The first pilots flying Viggen was given a watch made by the Swiss watch brand Lemania as a part of their personal gear. This watch was a manually wound chronograph with a black easy to read bezel. The watches were engraved with “Tre Kronor” and later got the nickname “Viggen” after the jet.

Lot 90 comes from the first batch of Lemania watches given to Viggen pilots and has accompanied its previous owner in flying all versions of the aircraft. Make sure to read the provenance letter online for more information.

Lot 117. Patek Philippe — s.c. “Tegola”

The Patek Philippe Ref. 2461 is referred to as the “Tegola” by collectors, thanks to its resemblance to a tile shape – Tegola meaning tile in Italian.

This reference, launched in 1960 and in production until the mid-1960s, replaced the narrower Ref. 425 “Tegolino”. The cases for the 2461 were made by Markowsky and are slightly curved to be comfortable on the wrist of the wearer. It is powered by one of Patek Philippe’s illustrious 9’90 movements, so well designed that Patek Philippe used it for more than 40 years. It is stamped with the prestigious Poinçon de Genève.

The 9’90 Patek Philippe movement is a tonneau shaped movement introduced in 1934 and was fitted into many famous Patek Philippe watches such as the “Banana” (Ref. 2442), the “Eiffel Tower” (Ref. 2441), the “Top Hat” (Ref. 1450), and the “Tegolino”.

Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.
