Lot 105. Panerai Luminor s.c. "Tropical Dial" Ref no. 6152-1

# Welcome to Important Watches — this autumn’s highlight for all watch enthusiasts

We are delighted to present this seasons’ 105 handpicked lots. With a solid catalogue, including a variety of different timepieces, we believe that this auction has something for everyone’s taste.

Find everything from Lot 90, a pocket watch with calendar complication, through Lot 65, an Omega Seamaster from 1971 with a so called “Banana Dial” to Lot 89, a Patek Philippe Aquanaut Traveltime with certificate from 2020.

One of the watches we are most excited to present is our grand finale, Lot 105, the Panerai Luminor from ca 1955–1960 with a so called “Tropical Dial”. A historical timepiece that cannot be missed - make sure to read more about it in the catalogue and on our website.

Rolex is always an important brand, and at almost every auction we can find themes within the Rolex families. This time we have a broad selection of different Day-Dates. For example, Lot 72 in 18K gold from 1988, Lot 77 in platinum with diamond covered lugs and Lot 79, a Day-Date 40 with diamond bezel.

Another well represented family from Rolex is the Submariners. For team two-tone we have three Ref. 16613 (Lots 21, 24 and 28) with either blue, black or so called “Sultan” dials. We can also present one of every version of green Submariner, the so called “Kermit”, “Hulk” and “Starbucks” (Lots 64, 47 and 31). The Kermit was the first Submariner with a green bezel ever produced. This piece is an early Mark I with the sought after “Fat Four”-bezel which was made exclusively on the first production batch. It also happens to be in great condition.

Something else we can offer numerous of this auction are racing chronographs. No matter if you are into Rolex Daytona or Omega Speedmaster, there will be a chronograph for you. Amongst the Daytonas we would like to highlight Lot 53, Ref. 16528 with inverted 6, Lot 60, a Ref. 16523 with box and certificate from 1997 and Lot 97, a Ref. 116523 with a so called “Racing Dial”.

There is also a wide range of Omega Speedmasters. From vintage Ref. 145.022 like Lots 2, 33 and 50 to almost brand-new Lots 27 and 55 as well as Lot 86, a Day-Date version in 18K gold.

If you are looking for something unique, you cannot miss out on Lot 104 – Roger Dubuis Excalibur Spider. This watch in black titanium and carbon, with a “Duotor” manual wound movement and skeletonised dial is only made in one example.

Lastly, we want to give a warm welcome our newest member of the team, Daniel Staaf. We are now a team of six committed watch enthusiasts who with great pride present these 105 lots – carefully selected for having that something extra.

We wish both sellers and buyers an exciting Saturday!

Kaplans Auktioner through

## Lot 105. Panerai Luminor s.c. “Tropical Dial” Ref no. 6152-1

In 1860, Italian watchmaker Giovanni Panerai opened a small watchmaker’s shop in Florence on Ponte alle Grazie to offer watch services and act as a watchmaking school. For many years, Panerai operated his small shop and school, but in the 1900’s the company started making timepieces for the Royal Italian Navy.

Later during the 1920’s, Panerai reached out to Rolex who created an enlarged Oyster case and supplied them with movements from pocket watches. This meant that they could now use the watches for different diving operations in military use.

This piece was produced approximately 1955–1960 and has a strong confirmed story from the watch-guru Jose Pereztroika, also known as “Perezcope” who is the world’s most known historian in vintage Panerai watches.

Please see the detailed information online for more information.

Lot 105 SEK 410 000 | € 35 340

M 6 D 6 C 7 B E O 10

PANERAI, Luminor, s.c. “Tropical Dial”, Cal 618 (Rolex), Serial no. 124735, Ref no. 6152-1, men’s wristwatch, 46 (53,5) mm, steel, manual winding, plastic crystal (damaged), case/movement manufactured by Rolex, leather strap, approx. 1955–1960.

# Buyer's Guide

All items at the auction are sold as seen. The buyer is therefore advised to carefully examine the condition of the lots before the auction. If Kaplans has made a serious error of judgement, stated any incorrect information, or if a so-called hidden defect exists, this may constitute a basis for cancelling the purchase. Complaints must be made within 10 days after the auction.

Our hammer auctions are physical auctions that are held at our premises at Biblioteksgatan 5 in Stockholm. You can bid online or bid in our auction room during these auctions. You may also submit absentee bids.

## Absentee bids

You may submit absentee bids for any item via Customer Services or our website until the time an auction starts. You indicate your maximum bid, which is the maximum amount you are willing to pay for a given lot. Customer Service then automatically bid on your behalf for this amount.

## Bid online

You can bid online during the auction. Simply log in with your customer number or registered email address and password. You submit your bid by clicking on the "Place bid" button. Your bid is made immediately and in accordance with our bidding intervals. All bids made at our auctions are binding. Kaplans Auktioner cannot guarantee that all bids are received at auction.

## Bidding in our auction hall

To bid in our auction hall during a hammer auction, you need an auction paddle that you obtain from Customer Services either prior to or during an auction. Your bid is binding until another bidder makes a higher bid. The buyer is the bidder who makes the last and highest bid when the auction hammer falls.

If two bidders make a bid of the same value, it is the auctioneer who determines which bid applies. The auctioneer also determines whether bidding should resume due to uncertainty surrounding the last bid.

Estimate prices are also quoted in Euro, where the exchange rate € 1 = SEK 11.60 is used in this catalogue. Amounts are rounded off up or down to the nearest ten. However, the final purchase price is set using the official exchange rate of the day of the auction. Purchased lots shall be paid in Swedish kronor. Purchased lots must be picked up and paid for within 5 business days from the auction date.

## Bidding increments

Bidding starts at the lowest bid and then follow these increments:

Increments SEK	Increase SEK
< 500	25
500 – 1 000	50
1 000 – 10 000	100
10 000 – 20 000	200
20 000 – 40 000	500
40 000 – 80 000	1 000
80 000 – 150 000	2 000
150 000 – 300 000	5 000
300 000 – 1 000 000	10 000
> 1 000 000	20 000

Bids are accepted within the bidding increments, however the auctioneer may deviate from these intervals.

## Buyer's premium

Kaplans Auktioner charges the buyer a premium of 20%, VAT included. For each item purchased at auction we also charge a hammer fee of SEK 50 including VAT.

### Example

You make the winning bid for an item at SEK 10 000. The amount you pay is calculated in the following way:  
SEK 10 000 + SEK 2 000 + SEK 50 = SEK 12 050.

## Buyer's premium levels

If the price exceeds SEK 200 000, we use the following staircase:  
Sales price up to SEK 200 000: 20%  
Sales price between SEK 200 000 – 500 000: 10% on the excess  
Sales price above SEK 500 000: 5% on the excess

### Premium example:

You have won an item for SEK 750 000  
 $200\,000 \times 20\% = \text{SEK } 40\,000$   
 $300\,000 \times 10\% = \text{SEK } 30\,000$   
 $250\,000 \times 5\% = \text{SEK } 12\,500$   
 Total buyer's premium = SEK 82 500  
 The hammer fee is SEK 50  
 Total amount: SEK 832 550

# Important Watches – at Kaplans Auktioner

## Selection

The idea of Important Watches is to create an auction which consists primarily of collectibles.

These watches may sometimes have a rather modest price, but somehow appeal to us because they are rare, unique and sometimes in mint condition. Some items may be restoration objects but can still be considered collectibles. We usually offer a couple of newer watches as well, in which case the watches are of more unusual models, with the associated certificate accompanied.

Boxes and certificates are available only when it is stated in the catalogue text.

All watches are sold as seen, both at the auction and in the store. All assessments of damage are subjective, as made by our experts. Buyers should carefully make their own assessment of the object.

The watches sold by Kaplans Auktioner are to be considered as art objects. This means that Kaplans Auktioner cannot guarantee the buyer that the watches work perfectly as timepieces.

Leather straps, gaskets and plastic crystals are considered service parts and may often be necessary to replace.

## Definitions, measurements and grading

“Not working” means that an overhaul of the watch at a watchmaker is necessary. It may concern a new battery, cleaning, new oil, and/or a repair.

“Defect” means that the watch is completely or partially damaged, and thus in a need of repair. It may also need new parts to get in good working condition.

Measurements described in the catalogue indicate the case’s outer dimensions, excluding crown and eventual push buttons.

All items are described with a grading system on a scale from one to ten, where ten is considered to be perfect. The categories that are graded are; movement (M), dial (D), case (C), bracelet (B). The expert’s opinion (EO) is our rating of the watch.

Example from a description of a watch: M 9, D 10, C 8, B 9, EO 9

## We recommend

When buying at an auction, you should expect some service or repair to be needed to get the watch in good condition. In some cases, such a repair and service may be costly. Please ask us before the auction.

Some watches need a battery replacement and all watches need new gaskets or a cleaning periodically.

We recommend an overhaul of the watch at a watchmaker’s at least every fifth to sixth years. For a watch to be waterproof, one should test it every one to two years.

For questions, contact us and we will do our best to help you.

## Tips and advice concerning your watch

Kaplans guarantees the authenticity of the watch and the accuracy of the cataloguing of the item you have purchased. All watches are sold as seen and therefore Kaplans is not responsible for the time accuracy of the watches. It is impossible to know where the current watch is in the service interval. If service documentation is not included you should expect the watch to be in need of an overhaul shortly.

## Service

All watches do have maintenance needs, and you should regularly submit your watch to a watchmaker for overhaul. The overhaul includes cleaning, oil change, new gaskets, etc.

Please note that watchmakers will perform an overhaul in different ways. It may sometimes be difficult to compare prices. We recommend you to always ask for a quote when you submit your watch. This way you know in advance what is to be done, at what cost, and an estimated delivery time.

A watch should get an overhaul at an interval of five to six years.

## Time Deviation

The quartz movement is generally resistant to shock and has a good precision. With a quartz movement you can expect a deviation of plus/minus maximum 10 seconds/month.

A mechanical watch (manual or automatic) has more parts and is therefore more sensitive to shocks. It is also influenced by temperature changes and movements, why you need to have a greater tolerance for differences in precision. With a mechanical watch you should expect a deviation of up to plus/minus 3–4 minutes/month.

## Waterproof

The waterproofing ability of a watch is expressed in the following instructions, often indicated on the watch dial:

30 m / 3 ATM / 3 bar

50 m / 5 ATM / 5 bar

100 m / 10 ATM / 10 bar

150 m / 15 ATM / 15 bar

200 m / 20 ATM / 20 bar

A watch is considered to be water resistant if it is marked 30 m. In practice, water resistant means that you may use it as an everyday watch, washing hands, washing dishes and wear it in slight rain.

If you want to be able to shower and swim with your watch, it must be resistant to at least 100 m.

To withstand diving and the stress this causes due to large pressure changes, the watch should at least be resistant to 200 m.

Note that the gaskets are to be seen as service parts and the watch must be maintained to retain its density. Kaplans recommends that you submit your watch to a watchmaker who works with the specific brand, to replace the gaskets and get the watch pressure tested every one to two years, or before a vacation by the seaside.

## Dial

All the objects are described with a grading system, including five categories that assess the condition from one to ten, where ten is considered to be perfect. One of the categories that are considered is the dial.

The damages assessed for a dial may for example include discoloration, moisture damage or some other kind of damage. It is rarely, if ever, that a damaged dial affects the function of the watch. This is a damage of a more cosmetic character.

## Leather Strap

We recommend our customers to buy a new leather strap, because the included strap on a used watch is often worn out. To take care of your newly purchased strap, wipe the band with a slightly damp, soft cloth after use.

## Bracelet

You can clean your watch bracelet yourself using a soft cloth or brush, soap and lukewarm water. However, it is very important to know that the watch is waterproof and has been tested recently so that it doesn't get damaged by moisture during the cleaning. In case of doubt, do not rinse the watch under water.

## Valuation certificate

We are happy to provide a written valuation certificate. Kaplans Auktioner's valuation certificates are recognized by all insurance companies and several of the appraisers who work at Kaplans Auktioner's Watch Department are "of the Swedish Chambers of Commerce appointed appraiser."

In addition to a picture and a clear cataloguing, your watch valuation certificate also contains a current market value. As this value for various reasons may change over time, it is important to renew your valuation certificate regularly. We, and most insurance companies, recommend that you do this after two, maximum three years, or if something remarkable happens to the watch.

## Lot 2. Omega — Speedmaster “Pre-Moon”

“One small step for man, one giant leap for mankind.” — Neil Armstrong.

This particular Omega Speedmaster model is known as “pre-moon” since it was conceived before the Apollo 11 moon landing, which was the first time ever man sat foot on the moon. On this specific model 145.022-69, which is the last pre-moon version, there is therefore no engraving referring to the moon landing like there is on later models.

This is also the first Omega Speedmaster with the new dial version where the Omega logo is painted instead of applied.

## Lot 10. Vacheron Constantin — Overseas

The first Vacheron Constantin Overseas was released in 1996 and has its heritage from the iconic Vacheron Constantin 222 that was produced from the 1970's until the mid-1980's.

The reference 49150 encapsulates the brand's rich heritage with the typical tonneau shaped case and the bezel with Maltese crosses. In the world of haute horlogerie this model stands as a symbol of timeless elegance, exceptional craftsmanship, and a legacy that spans centuries.

### Lot 14. Tudor — Submariner, s.c. “Mini-Sub”

The Tudor Trademark was registered in 1926 on behalf of Rolex founder Hans Wilsdorf who later went on to found the company Montres Tudor SA in 1946. The idea was to offer more affordable watches while keeping the Rolex-like quality. This was achieved by using Rolex parts together with off-the-shelf outsourced movements. As a result, many Tudor models were called the same name as Rolex models, hence this Submariner.

Lot 14 is a so called “Mini-Sub”, measuring 31 mm in diameter. It was only produced for a short time during the 1970’s and has the characteristic “Snowflake” dial with square indices and matching hands.

## Lot 20. Patek Philippe — Annual Calendar Complications

The Patek Philippe reference 5146P Annual Calendar can be considered an exercise in balance. The annual calendar movement itself is positioned between the more complex perpetual calendar and the less advanced calendar movements (which does not automatically adjust for the months with only 30 days). In terms of complexity, it then strikes a balance, only requiring to be set once a year (at the end of February). Stylistically it also strikes a balance with its larger case size than its predecessor the Ref 5035. With the addition of power reserve indicator and moon phase and the use of platinum as case material it is perceived as less conservative – in balance between formal and casual. Along with the beautiful yet discreet grey dial it is a striking and pleasantly wearable watch.

In addition to Lot 20, this auction also features fine examples of other Patek Philippe watches with annual calendar complication, Lot 4 and Lot 61.

## Lot 53. Rolex — Daytona Ref. 16528

With the introduction of the new Rolex Daytona in 1988, which replaced the original model from 1963, the Daytona got a new sturdier look and an automatic movement from Zenith instead of the manual wound Valjoux. The five-digit reference was produced from 1988 to approximately 2000.

It came with various versions of dials and different materials, in steel, steel/gold and solid gold. The “inverted 6” dial had a unique feature where the number 6 on the sub-dial at 6 o’clock appeared upside down.

Around the year 2000, Rolex transitioned from using the Zenith El Primero movement to its in-house Caliber 4130 for the Daytona collection. It is still a highly regarded and sought after model by collectors, particularly the earlier examples with the “inverted 6” dial and the iconic Zenith movement. Over time, Rolex has continued to refine and update the Daytona collection, making it one of the most iconic and desirable chronograph watches in the world.

## Lot 64. Rolex — Submariner s.c. “Kermit Mark I”

The Rolex Submariner 16610LV was first introduced by Rolex in 2003 to commemorate the 50th anniversary of the Submariner line. The “LV” in the reference number stands for “Lunette Verte,” which is French for “green bezel.”

This green bezel was a departure from the traditional black bezels found on most Submariners and was chosen as a nod to the brand’s corporate colour. The bezel on the early versions of the Kermit had a distinctive detail known as the “Flat Four”, that only existed on the first production batch, they then changed it to the so called “Slim Four” bezel.

The production run for the “Kermit” Submariner 16610LV was from 2003 until 2010, and the Mark I “Flat Four” is the most sought after of them all by enthusiasts all over the world.

## Lot 68. Rolex — Day-Date Ref. 18038

The Rolex Day-Date reference 18038 is a legendary timepiece that has left a permanent mark in the world of luxury watches. It was introduced in 1977 with some updates in comparison to its predecessor; date quickset, sapphire crystal, and a new movement - Cal 3055. This timepiece is not only a symbol of horological excellence but also a status symbol, synonymous with success and achievement. Over the years, the Day-Date has evolved, with different dial options and bracelet choices, allowing owners to personalise their timepiece to suit their lifestyle. Whether it's the classic champagne dial or the rare gem-set variations, each Day-Date 18038 is a masterpiece of its own.

# Kaplans Auktioner

Kaplans Auktioner is a family run business in its third generation. Kaplans Auktioner is the leading Swedish auction house for jewellery, silver, precious stones and watches. The auction house is situated on no 5 in the famous shopping street Biblioteksgatan in Stockholm, Sweden.

In addition to the weekly auctions throughout the year, Kaplans Auktioner also offers valuation service, a great selection of unique jewellery and watches in the shop, and also holds an inhouse goldsmith workshop. This gives Kaplans Auktioner a unique ability to offer customers tailor-made solutions at a very competitive price.

With more than 100,000 items for sale each year, Kaplans Auktioner reaches a large audience of buyers and sellers, both in Sweden and in the Nordic countries, as well as in the rest of the world.
